Simon Jansson

My name is Simon Jansson — technical co-founder and student at Halmstad University targeting the Intelligent Systems programme in 2026. I am currently building a proprietary AI-powered personal finance platform with 13 custom on-device AI modules, integrated with Swedish banking infrastructure and digital ID systems, targeting App Store launch in 2026.

Prior to my studies I reached ELIT at Verisure. The single highest title in the entire organization, awarded to less than 1% of all advisors in Sweden. I bring a rare combination of technical depth, entrepreneurial drive and proven commercial ability.
